

# SDE-3206

1RU 32x6 3G/HD/SD-SDI / DVB-ASI  
Router

[2024 Datasheet](#)

The SDE-3206 stands as a compact and dependable 32-to-6 router, offering versatility and reliability in signal routing. This router is format-agnostic, capable of seamlessly handling 3G/HD/SD-SDI and DVB-ASI signals while featuring a re-clocking function to maintain signal integrity.

For added convenience, an optional button per source (BPS) front panel is available, allowing standalone operation of the router. Whether with or without this option, multiple Samim control panels can connect to the router via LAN connection, facilitating flexible routing control.

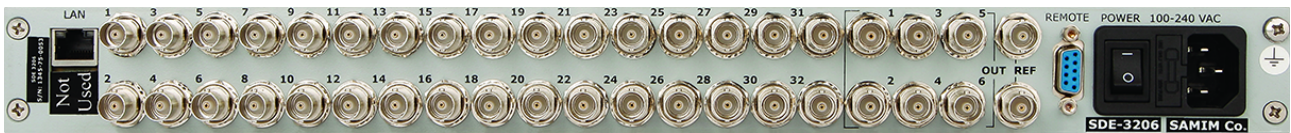

Moreover, the router offers a clean and quiet switching option for three of its outputs when routing identical format SDI inputs. However, with reference input, non-clean outputs adhere to standard-specified switching lines, ensuring minimum glitches when changing routes.

Configuration of the SDE-3206 is streamlined through its web-based user interface, providing users with access to all settings and adjustments.

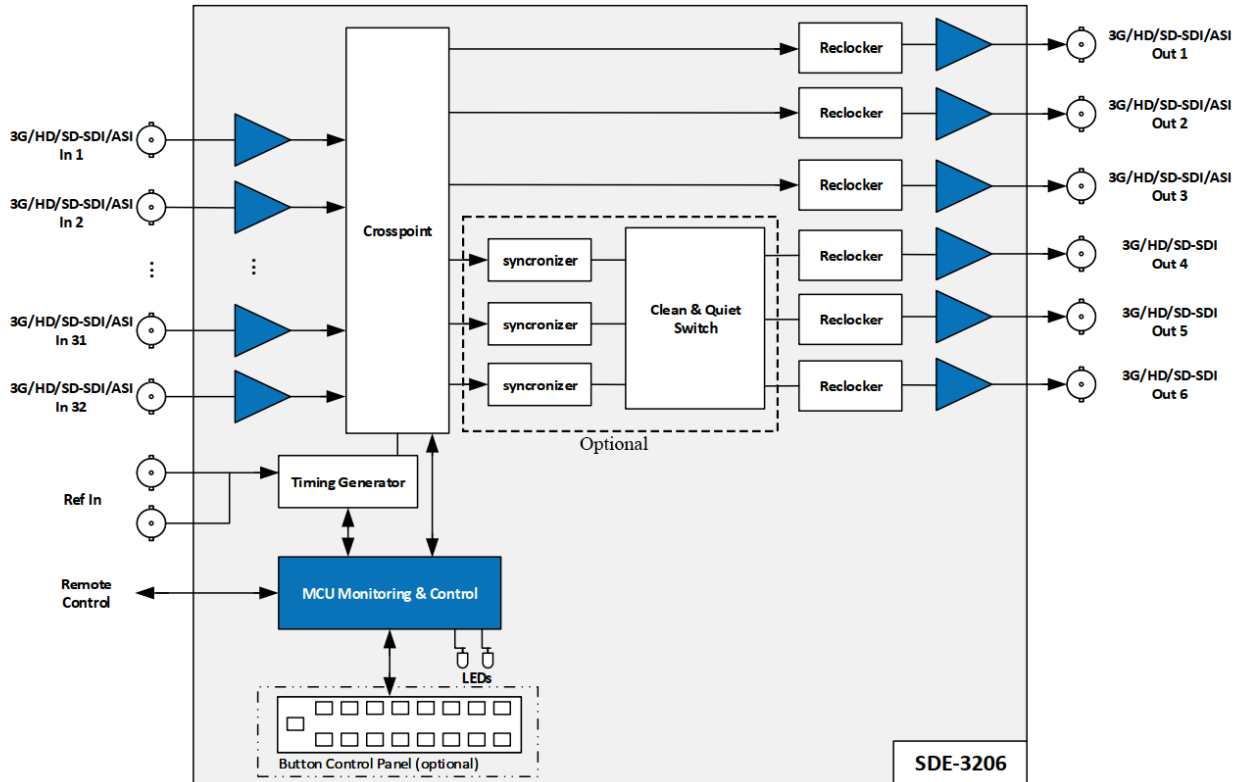

## Main Features

- Format-agnostic routing
- Two different front panels available
- Control functions with BPS front panel: Take, Lock, Undo
- Reference input with passive loop
- Optional clean and quiet outputs
- Re-clocked outputs
- Simultaneous connection with several Samim control panels
