

IIP-2000-CSIR

8-Channel Analog Interface for
IP-based Intercom

2024 Datasheet

The IIP-2000-CSIR is a complementary component of the Samim Intercom System, designed to seamlessly integrate eight channels of analog audio input and output (line-level) into the intercom system via a network connection. This product facilitates the establishment of audio connections between intercom panels and the CCU of studio cameras, audio mixers, microphones, or speakers.

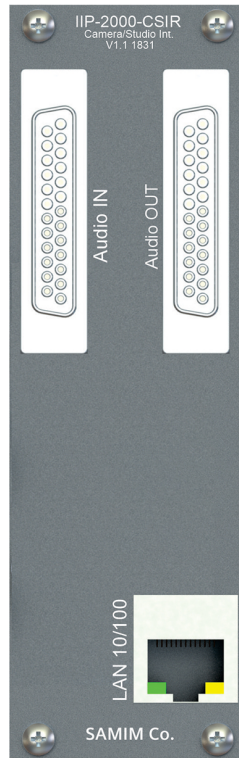

Pressing the designated key assigned to a CSIR channel on a Samim intercom panel instantly establishes a full-duplex connection. This allows the panel user to listen to the line input of the channel while their voice becomes accessible at the line output. Each CSIR channel can accommodate up to three simultaneous connections and can combine incoming voices on its output. Note that eight channels of CSIR are completely independent and can be used for separate purposes making it a handy gear in dynamic environments.

Module configuration is accessible via a web-based user interface, streamlining the setup process for users.

Key Features

- Eight independent full-duplex channels compatible with the Samim intercom protocol
- Eight sets of line input and output via D-sub connectors
- Accepting three simultaneous connections per channel
- 10/100 LAN connection for intercom streams (separate from frame Ethernet connection)
- Easy setup

Back Panel

System Requirements

Type	Product	Description
Frame	SRM-0645	1RU Frame with Controller
	SRM-0655	3RU Frame with Controller

Ordering Information

Order Code	Description	Type
IIP-2000-CSIR	8-Channel Analog Interface for IP-based Intercom	Main Board
IIP-2000-CSIR-3DRP	Back-panel for IIP-2000-CSIR (compatible with SRM-655)	Back panel
IIP-2000-CSIR-1DRP	Back-panel for IIP-2000-CSIR (compatible with SRM-645)	Back panel

With over two decades of extensive experience in the broadcast and media industry, Samim Group has emerged as a rapidly growing manufacturer and developer of professional-grade hardware and software solutions that cater to Broadcast Production Infrastructure, Intercom Systems, and Media Business Automation. We remain attuned to the latest technological advancements, ensuring we deliver high-standard solutions and products that can be marketed globally.
